TOXICOLOGICAL INFORMATION

Reported Human Effects:

Human repeated insult patch testing conducted on a similar product showed that the material is characterized as one devoid of irritating propensities and of sensitizing propensities that can be detected by the method used in the study.

Reported Cell Effects:

Cytotoxicity testing conducted on a similar product showed that the material is considered non-cytotoxic and meets the requirements of the Elution Test, ISO 10993-5 (or equivalent).

Carcinogenicity Information:

None of the components in the product at greater than 0.1% are listed by ACGIH, NTP or OSHA as a carcinogen. Titanium dioxide is classified by IARC as a category 2B carcinogen.
